회원관리-회원가입(백엔드)

[KB] IT's Your Life

1 회원관리 - 회원 가입

✓ 백엔드 준비하기

○ 회원관리 기본 패키지

- org.scoula.member

회원관리 – 회원 가입

✓ 회원 가입

○ 회원 가입시 고려사항

- username 중복 여부 점검
- 비밀번호 암호화
- 회원 정보 저장시 회원 권한도 같이 저장 → 트랜잭션 처리
- 회원 아바타 이미지 파일 업로드 → c:/upload/avatar/<username>.jpg 형태로 저장

○ DTO

- MemberJoinDTO
- MemberDTO

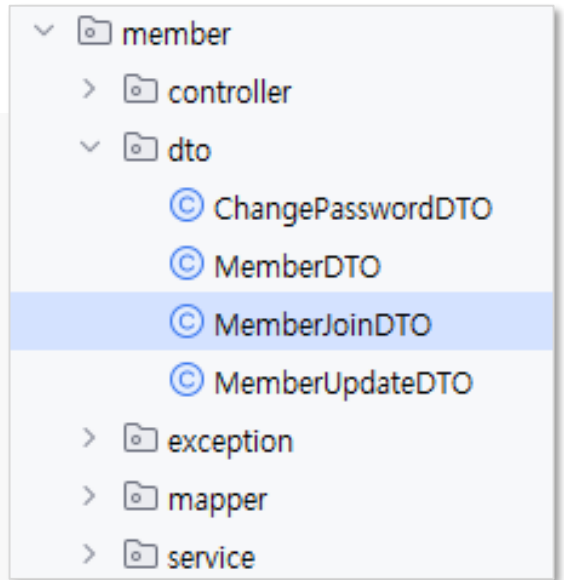

MemberJoinDTO.java

```
package org.scoula.member.dto;

...
import org.scoula.security.account.domain.MemberVO;
import org.springframework.web.multipart.MultipartFile;

@Data
@NoArgsConstructor
@AllArgsConstructor
@Builder
public class MemberJoinDTO {
    String username;
    String password;
    String email;

    MultipartFile avatar;
```

MemberJoinDTO.java

```
public MemberVO toVO() {  
    return MemberVO.builder()  
        .username(username)  
        .password(password)  
        .email(email)  
        .build();  
}  
  
}
```

○ MemberVO에 @Builder 추가

MemberDTO.java

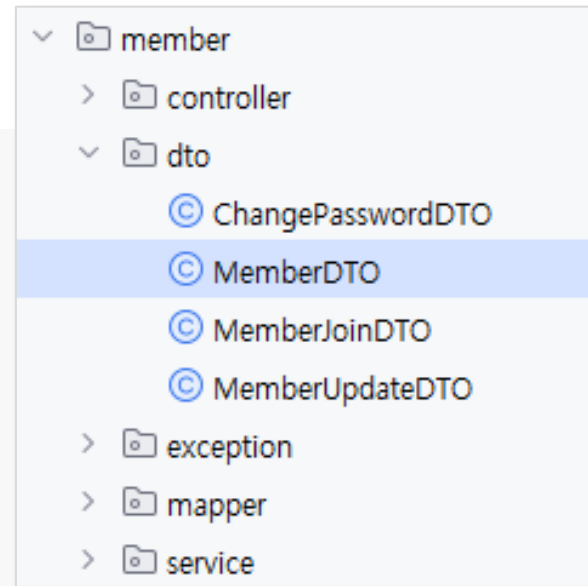

```
package org.scoula.member.dto;

...
import org.scoula.security.account.domain.MemberV0;
import org.springframework.web.multipart.MultipartFile;

...
@Data
@NoArgsConstructor
@AllArgsConstructor
@Builder
public class MemberDTO {
    private String username;
    private String email;
    private Date regDate;
    private Date updateDate;

    MultipartFile avatar;

    private List<String> authList; // 권한 목록, join 처리 필요
```

MemberDTO.java

```
public static MemberDTO of(MemberVO m) {  
    return MemberDTO.builder()  
        .username(m.getUsername())  
        .email(m.getEmail())  
        .regDate(m.getRegDate())  
        .updateDate(m.getUpdateDate())  
        .authList(m.getAuthList().stream().map(a->a.getAuth()).toList())  
        .build();  
}  
  
public MemberVO toVO() {  
    return MemberVO.builder()  
        .username(username)  
        .email(email)  
        .regDate(regDate)  
        .updateDate(updateDate)  
        .build();  
}  
}
```

MemberMapper.java

```
package org.scoula.member.mapper;

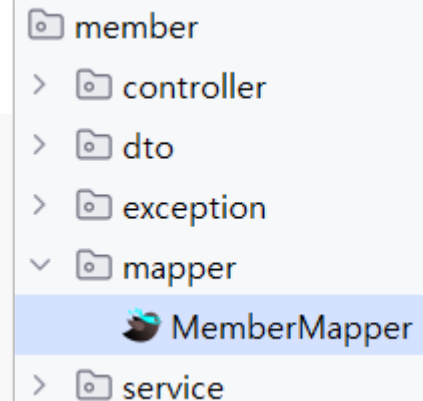

...
import org.scoula.security.account.domain.AuthVO;
import org.scoula.security.account.domain.MemberVO;

public interface MemberMapper {
    MemberVO get(String username);

    MemberVO findByUsername(String username); // id 중복 체크시 사용

    int insert(MemberVO member); // 회원 정보 추가

    int insertAuth(AuthVO auth); // 회원 권한 정보 추가
}
```

MemberMapper.xml

```
<?xml version="1.0" encoding="UTF-8" ?>
<!DOCTYPE mapper
    PUBLIC "-//mybatis.org//DTD Mapper 3.0//EN"
    "http://mybatis.org/dtd/mybatis-3-mapper.dtd">

<mapper namespace="org.scoula.member.mapper.MemberMapper">
    <resultMap id="authMap" type="AuthVO">
        <result property="username" column="username" />
        <result property="auth" column="auth" />
    </resultMap>

    <resultMap id="memberMap" type="MemberVO">
        <id property="username" column="username" />
        <result property="username" column="username" />
        <result property="password" column="password" />
        <result property="email" column="email" />
        <result property="regDate" column="reg_date" />
        <result property="updateDate" column="update_date" />
        <collection property="authList" resultMap="authMap" />
    </resultMap>
```

MemberMapper.xml

```
<select id="get" resultMap="memberMap">
    SELECT m.username, password, email, reg_date, update_date, auth
    FROM
        tbl_member m
    LEFT OUTER JOIN  tbl_member_auth a
        ON m.username = a.username
    where m.username = #{username}
</select>

<select id="findByUsername" resultType="org.scoula.security.account.domain.MemberVO">
    SELECT * FROM tbl_member WHERE username = #{username}
</select>
```

MemberMapper.xml

```
<insert id="insert">
    INSERT INTO tbl_member
    VALUES(#{username}, #{password}, #{email}, now(), now() )
</insert>
```

```
<insert id="insertAuth">
    INSERT INTO tbl_member_auth(username, auth)
    VALUES(#{username}, #{auth})
</insert>
```

```
</mapper>
```

MemberService.java

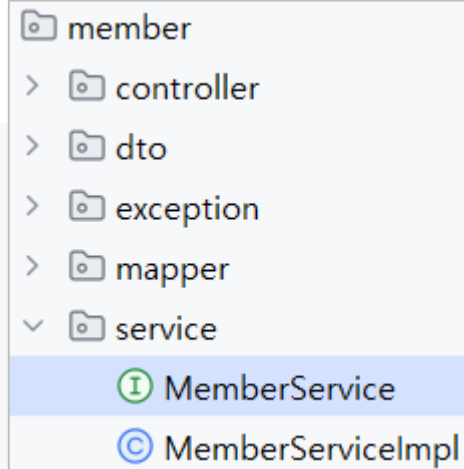

```
package org.scoula.member.service;

import org.scoula.member.dto.MemberJoinDTO;

public interface MemberService {
    boolean checkDuplicate(String username);

    MemberDTO get(String username);

    MemberDTO join(MemberJoinDTO member);
}
```

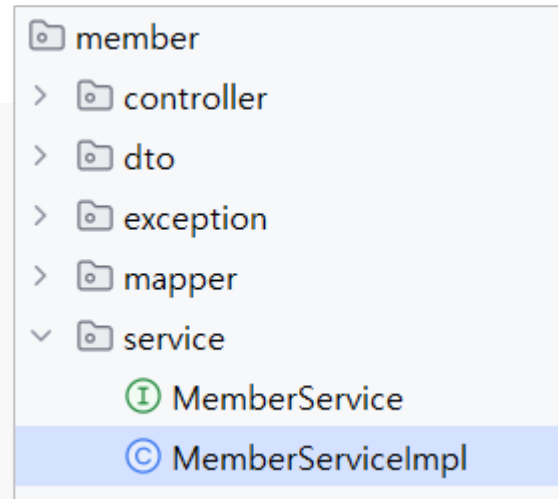

MemberServiceImpl.java

```
package org.scoula.member.service;

...
@Slf4j
@Service
@RequiredArgsConstructor
public class MemberServiceImpl implements MemberService{
    final PasswordEncoder passwordEncoder;
    final MemberMapper mapper;

    @Override
    public boolean checkDuplicate(String username) {
        MemberVO member = mapper.findByUsername(username);
        return member != null ? true : false;
    }
}
```

MemberServiceImpl.java

```
@Override
public MemberDTO get(String username) {
    MemberVO member = Optional.ofNullable(mapper.get(username))
        .orElseThrow(NoSuchElementException::new);
    return MemberDTO.of(member);
}

private void saveAvatar(MultipartFile avatar, String username) {
    //아바타 업로드
    if(avatar != null && !avatar.isEmpty()) {
        File dest = new File("c:/upload/avatar", username + ".png");
        try {
            avatar.transferTo(dest);
        } catch (IOException e) {
            throw new RuntimeException(e);
        }
    }
}
```

MemberServiceImpl.java

```
@Transactional
@Override
public MemberDTO join(MemberJoinDTO dto) {
    MemberVO member = dto.toVO();

    member.setPassword(passwordEncoder.encode(member.getPassword())); // 비밀번호 암호화
    mapper.insert(member);

    AuthVO auth = new AuthVO();
    auth.setUsername(member.getUsername());
    auth.setAuth("ROLE_MEMBER");
    mapper.insertAuth(auth);

    saveAvatar(dto.getAvatar(), member.getUsername());

    return get(member.getUsername());
}
}
```

✓ 컨트롤러

○ URL

- GET /api/member/checkusername/{username}
- POST /api/member

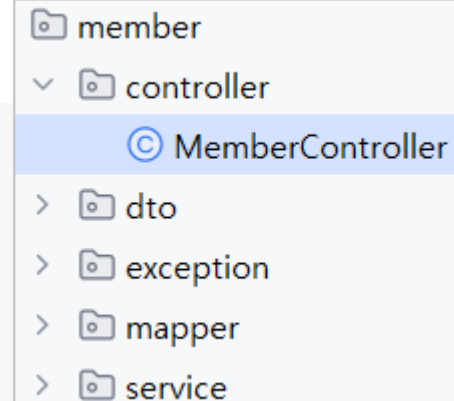

MemberController.java

```
package org.scoula.member.controller;
...

@Slf4j
@RestController
@RequiredArgsConstructor
@RequestMapping("/api/member")
public class MemberController {
    final MemberService service;

    @GetMapping("/checkusername/{username}")
    public ResponseEntity<Boolean> checkUsername(@PathVariable String username) {
        return ResponseEntity.ok().body(service.checkDuplicate(username));
    }

    @PostMapping("")
    public ResponseEntity<MemberDTO> join(MemberJoinDTO member) {
        return ResponseEntity.ok(service.join(member));
    }
}
```

✓ 컴포넌트 스캔을 설정

RootConfig.java

```
@Configuration
@PropertySource({"classpath:/application.properties"})
@MapperScan(basePackages = {"org.scoula.board.mapper", "org.scoula.member.mapper"})
@ComponentScan(basePackages = {"org.scoula.board.service", "org.scoula.member.service"})
@Slf4j
public class RootConfig {
    ...
}
```

ServletConfig.java

```
@EnableWebMvc
@ComponentScan(basePackages = {
    "org.scoula.controller",
    "org.scoula.exception",
    "org.scoula.board.controller",
    "org.scoula.member.controller",
})
public class ServletConfig implements WebMvcConfigurer {
```

2024년 상반기 K-디지털 트레이닝

회원관리-회원가입(프론트엔드)

[KB] IT's Your Life

✓ authApi 모듈

api/authApi.js

```
import api from 'axios';

const BASE_URL = '/api/member';
const headers = { 'Content-Type': 'multipart/form-data' };

export default {
  // username 중복 체크, true: 중복(사용불가), false: 사용 가능
  async checkUsername(username) {
    const { data } = await api.get(`${BASE_URL}/checkusername/${username}`);
    console.log('AUTH GET CHECKUSERNAME', data);
    return data;
  },
}
```

api/authApi.js

```
async create(member) {  
  // 아바타 파일 업로드 – multipart 인코딩 필요 → FormData 객체 사용  
  
  const formData = new FormData();  
  formData.append('username', member.username);  
  formData.append('email', member.email);  
  formData.append('password', member.password);  
  
  if (member.avatar) {  
    formData.append('avatar', member.avatar);  
  }  
  
  const { data } = await api.post(BASE_URL, formData, headers);  
  
  console.log('AUTH POST: ', data);  
  return data;  
}  
};
```
